

MYSQL... The Next Step

TODAY'S ASSIGNMENT

- 1) Create a table in PHPMYADMIN called "Classes"
 - a. It should have the following columns:
 - i. ID (INTEGER, UNSIGNED, AUTOINC, KEY)
 - ii. username (varchar 30)
 - iii. ClassName (varchar 30)
- 2) Create a page called "addClass.php" that allows a user to add a class
 - a. This page should only have a textbox for class
 - b. The page should redirect the user to the listClasses page after doing the insertion
 - c. The INSERT INTO code should be:

```
"INSERT INTO Classes (continued on next line)
SET username = '{$_SESSION['username']}', ClassName = '{$_POST['ClassName']}'
```

- 3) Create a page called "listClasses.php" that displays a users classes
 - a. The SQL code should be

```
"SELECT * FROM Classes WHERE username = '{$_SESSION['username']}' ";
```

Call me over when you can add a class and have it appear on the listing page.
